

## Discovery journey into the world of science

SCIENCE CAN presents the new PEDIA LINE

Nuremberg, 22<sup>th</sup> January 2025

Discover science interactively - the launch of a fascinating product line that will continue to grow in 2025. SCIENCE CAN launches the new PEDIA LINE. The PEDIA LINE opens up exciting insights into the world of science for curious children from the age of 6. Three thematically coordinated products explain complex topics in a child-friendly way and bring them to life with interactive functions. An integrated explanation and quiz function with a self-control mechanism encourages independent learning.

The products in the PEDIA LINE are characterized by a combination of fun and educational added value. Every detail has been developed with the needs of curious children and the requirements of high-quality educational toys in mind. The focus is on interactivity, multilingualism and visual elements to make it easier to absorb knowledge and encourage long-term interest.

The “Human Body” will be followed by two further highlights this year: The Earth and the Solar System. With interactive functions, child-friendly design and exciting content, the PEDIA LINE sets new standards in the world of educational toys.

## Our new product highlights:

### THE EARTH

With **THE EARTH**, our home planet becomes accessible in a new dimension. The fold-out globe shows the inner layers of the Earth, from the core to the surface, with removable sections. 18 interactive knowledge cards include 66 exciting facts and 48 quiz questions on topics such as geosciences, wonders of the world, and the geological ages. The dynamic light in the earth's core provides additional visual stimulation. The bilingual voice output in German and English enables a wide range of applications.

6-12 Years  
SRP: 44,99 EUR

### THE SOLAR SYSTEM

**THE SOLAR SYSTEM** brings the vastness of the universe to life and encourages imagination at the same time. The sun serves as a projector and projects impressive images of space phenomena and space travel onto the wall or ceiling. The 3D model with movable planets invites children to discover our solar system with their hands. Three interactive cards printed on both sides offer 48 interesting facts and 53 exciting questions on topics such as space travel, astronomical tools and curious phenomena. The bilingual voice output in German and English enables a wide range of applications.

6-12 Years  
SRP: 39,99 EUR

**About SCIENCE CAN:**

SCIENCE CAN's science-orientated toys help children discover and explore the world through play. Our design-orientated products focus on the entertaining transfer of knowledge on scientific topics. With our products, kids immerse themselves in the micro- and macrocosm of our world. Sophisticated and unconventionally developed, the modern toys are authoritative in their functionality and straightforward design. The multifunctionality of each product shows them the most diverse aspects to discover - always with high-quality materials of the best quality.
